

Cream Soda Ice Cream

Looking for ways to beat the summer heat? Ice cream does the trick for me. I'm not a huge fan of heavy ice cream flavors but I do enjoy the fruity tasty of these ice creams made with orange and cherry cream soda. There are only 3 ingredients and whipping this up is a breeze.

- 8 cups of your favorite cream soda
- 2 cups whipping cream
- 2 14 oz cans sweetened condensed milk

In a large bowl stir the whipping cream and condensed milk together until blended. Pour mixture into 4 quart ice cream freezer (recipe can be halved for smaller 1 1/2 quart freezer). Slowly add the creme soda and stir gently with a wire whisk to blend soda with the condensed milk/whipping cream mixture. Freeze mixture according to manufacturer's directions. Serve right away and store ice cream in an air tight container in freezer.
